Pepperl+Fuchs rewarded once again

Invensys recognizes Pepperl+Fuchs for outstanding performance

Invensys Process Systems, has recognized Pepperl+Fuchs as a preferred supplier of highly developed interface products for the global process industries.

Headquartered in Foxboro, Massachusetts, Invensys Process Systems is a major global supplier of instruments, systems, software, and services for industrial process automation, optimization, real-time plant intelligence, and asset performance management. Primary customer industries include Refining and Petrochemicals, Upstream Oil & Gas, Pharmaceuticals & Fine Chemicals, and Power & Utilities. Invensys also serves the Pulp & Paper, Food & Beverages, and Mineral Processing industries.

Pepperl+Fuchs has a long history with Invensys and supports the activities of the corporation primarily with interface products for process automation. Invensys provides these products primarily via its Foxboro and Triconex units. These business units operate on an international scale and enjoy a high reputation for their products, services and complete solutions for automation in the process industry.

One primary aspect which considerably contributed to the success of Pepperl+Fuchs is the global account management for Invensys. It forms an international network of specialists which operate from a variety of locations throughout the world to offer our customers comprehensive on-site assistance.

Pepperl+Fuchs is also a globally oriented enterprise and therefore fits perfectly to the business concept of Invensys.

Invensys recently recognized Pepperl+Fuchs for the company's outstanding performance as a key supplier of advanced process interface products designed to meet the needs of Invensys' global customers. Pepperl+Fuchs is proud of this strong sign of recognition and

considers it as an acknowledgement of its corporate goal to provide the worldwide process industry with sensors and interface products to support the automation function.

Ken Brown, vice president of supply chain at Invensys Process Systems, commented, "We're extremely pleased to recognize Pepperl+Fuchs as a highly valued global partner. Among other contributions, Pepperl+Fuchs' products enhance both the hazardous area protection and fieldbus connectivity capabilities of our Foxboro I/A Series automation system."
